*Covers print on 100# G2S Gloss Text  
Flat & Trimmed 14.25" wide x 4.7" high  
Folded 4.75" wide x 4.7" high*

### SIX PANEL CD COVER DESIGN SPECIFICATIONS

1. Assemble the artwork in QuarkXpress (if you absolutely can't use Quark, refer to the General Design Specs)
2. Make the size of the Quark document EXACTLY the same as the trimmed size of the piece (14.25" x 4.7")
3. Bleeds must extend .125" beyond the live area (that means outside the edge of the document's boundaries)
4. It is good practice not to place critical type closer than .125" from the edge of the art.
5. Placed artwork must be tiff or eps file formats (refer to the General Design Specs for clarification)
6. Use postscript fonts – truetype is unreliable (refer to the General Design Specs for clarification)
7. All colors must be defined as CMYK or PMS (Pantone) colors – delete unused colors from the color palette
8. Send all graphics and fonts used in the document along with the Quark document on a Zip disk
9. Send printouts of all pieces along with the digital files (refer to the General Design Specs for clarification)
